poly-Treat

- Supports Fertility*
- Supports Healthy Ovarian Function*
- Optimizes Hormonal Balance & Mood*

Poly-Treat is a dietary supplement that can improve overall reproductive health because it promotes female fertility, healthy ovarian function, and helps egg quality. Additionally, optimizing the function of your reproductive system and allowing it to maintain your fertility as it should be.

Poly-Treat offers an approach to reaching your health and fertility goals with a comprehensive multivitamin to address nutritional gaps in your daily diet along with fertility-targeted ingredients such as Myo-Inositol, D-Chiro Inositol, L-Tyrosine, L-Arginine, Chromium, Selenium, Folic Acid, Co-Enzyme Q10, and Omega 3.

Recommended Dosage:

Take 3 capsules daily with water or as directed by your doctor. Use it for at least 2-3 months before expecting a significant alteration in hormone balance & fertility.

Inositol: is effective in normalizing ovarian function and improving oocyte and embryo quality in PCOS. It has been shown to play a significant role in insulin signaling and glucose metabolism. It has the ability to reduce insulin resistance and testosterone levels to correct hormonal imbalances that lead to anovulation and decreased pregnancy chances.

Myo-inositol: helps improve insulin resistance, which could lead to a reduction in a number of PCOS symptoms. The supplement does so by helping your body use insulin more effectively.

L-Arginine: has protective effects against PCOS, improves menstrual function and increases egg counts in women undergoing IVF.

L-Tyrosine: is helpful for women with PCOS who are overweight as it helps to suppress the appetite and burn off fat.

Co-Enzyme Q10: supports the mitochondria within the egg cells, potentially slowing reproductive aging. It increases antral follicle count and the ovaries' response to medication during an IUI or IVF cycle.

Omega 3: can regulate the menstrual cycle in women with PCOS and it can also help decrease inflammation in the body.

Zinc: has many benefits for women with PCOS, including blood sugar balance, optimizing hormone production, and decreasing PCOS symptoms, like unwanted hair growth or acne.

Magnesium: is an essential mineral to help balance hormones. It has also been shown to promote better sleep, which can also have a beneficial effect on anxiety.

Chromium: is an important element beneficial for treating polycystic ovaries. It regulates the metabolism of carbohydrates and fats, improves body composition, and lowers BMI. It also governs the disturbances in the hormonal profile due to polycystic ovaries. In addition, benefits include the regulation of the menstrual cycle and an increased chance of ovulation.

Selenium: helps maintain the health of the follicular fluid surrounding women's eggs.

Vitamin D: eases some PCOS problems, such as infertility, weight gain, and anxiety. That, in turn, can improve your overall health and further improve your emotional state and energy, which can lead to even more wellness gains.

Vitamin E: could improve endometrial thickness in women with unexplained infertility, and the effects were attributed to its anticoagulant and antioxidant effects.

Vitamin C: contributes to the normal function of the immune system and also helps protect cells from oxidative stress.

Folic acid: contributes to the growth of maternal tissue during pregnancy and normal blood formation.

Vitamin B6: plays a role in the regulation of hormonal activities and contributes to the reduction of fatigue.

Supplement Facts

Serving Size: 3 Capsules
Servings Per Container: 90

Amount Per Serving	
Myo-Inositol	2000 mg
D-Chiro-Inositol	25 mg
L-Tyrosine	500 mcg
L-Arginine	500 mcg
Coenzyme Q10	50 mg
